Requirements

1. Disable - Windows Defender | Smart Screen | Exploit Protection | Core Isolation
2. Enable - Hyper-V
3. Delete - Anti-Virus | AntiCheat [Faceit, Vangaurd, ESEA]

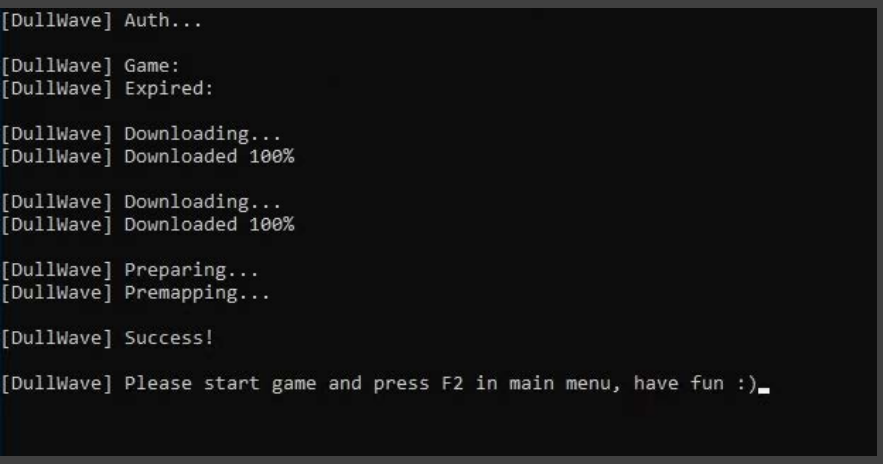

The startup process:

1. Make sure that the game is not running before launching the loader, otherwise there is a chance of banned!
2. Run the loader as an administrator, sign in and wait for full initialization, when you see the "Press start game and press F2" start the game, when game be fully loaded
3. **For INJECT** - **Press F2** in main menu
4. Menu bind **HOME** | For **DayZ** **TAB**

For **Call Of Duty** [At the first startup, the PC may need to be rebooted, a reboot can be performed automatically! SAVE IMPORTANT FILES BEFORE LAUNCHING THE LOADER!!!!!]

For **RUST**

1. Run discord and enable DISCORD OVERLAY [non legacy]
2. Run game and wait discord overlay startup
3. Press F4 in main menu for inject

IMPORTANT RECOMMENDATIONS!!!!

1. The loader will be automatically deleted after successful init, for restart you should re-download loader from site
2. WE STRONGLY RECOMMEND USING LOADER ONLY ON FLASH DRIVE AND DO NOT STORING OUR FILES ON PC, DO NOT FORGET TO REMOVE FLASH DRIVE AFTER SUCCESSFUL LOADER INIT
